Gravity 144Wh - Solar Generator

Smallest Outlet Portable Power Station

The Gravity 144 is a handheld, high capacity portable battery, capable of providing high AC power and DC power for all your devices. It can be recharged via wall outlet (the charger is provided) or via solar panels. We recommend using the adequate Sunslice 40W solar panels to charge your devices quickly and efficiently. It is the ideal choice to have high capacity and power capabilities at a reasonable weight and affordable budget. Whether it be for an expedition, for a drone flying afternoon to get a few hours of extra flying time, to recharge power tools when far away from the electric grid or to work quietly from your own garden, the Gravity 144 is a great choice!
